Install required dependencies:

- **React and React Native:** *Make sure you have React and React Native installed. You can install them using npm*
npm install react react-native
- **React Navigation and its dependencies:**
npm install @react-navigation/native @react-navigation/stack
npm install react-native-screens react-native-safe-area-context
- **Expo vector icons:**
npm install @expo/vector-icons
- **Expo linear gradient:**
expo install expo-linear-gradient
- **Install additional dependencies for gesture handling and animations:**
npm install react-native-gesture-handler react-native-reanimated react-native-pager-view
- **Link the dependencies** (if not using Expo):
npx react-native link

If you're using Expo, you don't need to manually link the dependencies as Expo handles the linking automatically.

- **install the dependencies required for navigation:**
expo install react-native-gesture-handler react-native-reanimated react-native-screens react-native-safe-area-context @react-native-community/masked-view
- **Expo Audio:**
expo install expo-av
- **Supabase Client:**
npm install @supabase/supabase-js
- **react-native-svg:**
npm install react-native-svg

- **AsyncStorage:**
npm install @react-native-async-storage/async-storage
- **Install Dependencies:** Navigate to the project directory and run
npm install to install all dependencies listed in package.json.
